Unit 9 Assignment

Outcomes addressed in this activity:

Unit Outcomes:

- Discover global security threats to networks.
- Identify common secure network protocols.

Course Outcomes:

IT273-5: Practice global interconnectedness as it applies to information technology.

GEL-7.6: Apply ethical rules governing Information Technology.

PC-4.2: Demonstrate an understanding of how one's perspective toward multiculturalism and diversity impacts an organization.

Assignment Instructions

Part 1: For many thousands of years, the primary method of communication was for people to physically gather together to share ideas and discuss concerns. In today's technology driven world, huge numbers of people gather together without ever directly seeing each other. This is done through social media. Social media is known to produce great changes on how individuals and communities communicate and perceive each other.

Complete the following in a minimum 1-page response:

1. Briefly, define social media such as Google+®, Twitter®, Pinterest®, LinkedIn®, and Facebook® and how it differs from traditional media. In addition, how has social media impacted the workplace?

2. Given the increased prevalence of social media, how has your personal perspective of multiculturalism and diversity been impacted?

3. Select an organization you belong to. How do you think your perspective has impacted that organization? How do you feel that others in the organization have been impacted?

Part 2: As an information technology professional, you are faced with ethical rules in your daily work. Research ethical considerations faced in the Information Technology field as it pertains to networking. Identify and use one to complete Part 2.
