

# Performance Overview for Bruce Nsubuga on case Billy Johnson

The following table summarizes your performance on each section of the case, whether you completed that section or not.

**Time spent: 2hr 23min 2sec**

**Status: Submitted**

Case Section	Status	Your Score	Time spent	Performance Details
Total Score		85%		
History	Done	85%	1hr 11min 38sec	55 questions asked, 32 correct, 6 missed relative to the case's list
Physical exams	Done	88%	27min 3sec	95 exams performed, 12 correct, 1 partially correct, 0 missed relative to the case's list
Key findings organization	Done		6sec	16 findings listed; 10 listed by the case
Problem statement	Done		10min 5sec	122 words long; the case's was 82 words
Differentials	Done	100%	6min 52sec	5 items in the DDx, 5 correct, 0 missed relative to the case's list
Differentials ranking	Done	100% (lead/alt score) 80% (must not miss score)	1min 19sec	
Tests	Done	50%	8min 4sec	2 tests ordered, 1 correct, 1 missed relative to the case's list
Diagnosis	Done	100%	9sec	
Management plan	Done		7min 3sec	102 words long; the case's was 248 words
Exercises	Done	62% (of scored items only)	6min 22sec	4 of 7 correct (of scored items only) 1 partially correct

Attempt: 2837321

# History Notecard by Bruce Nsubuga on case Billy Johnson

Use this worksheet to organize your thoughts before developing a differential diagnosis list.

1. Indicate key symptoms (**Sx**) you have identified from the history. Start with the patient's reason(s) for the encounter and add additional symptoms obtained from further questioning.
2. Characterize the attributes of each symptom using "**OLDCARTS**". Capture the details in the appropriate column and row.
3. Review your findings and consider possible diagnoses that may correlate with these symptoms. (Remember to consider the patient's age and risk factors.) Use your ideas to help guide your physical examination in the next section of the case.

## Problem Statement by Bruce Nsubuga on case Billy Johnson

The patient is a 13-year-old boy who reported to the clinic accompanied by his mother with complaints of difficulty in school. The mother reported that his teachers complained of inability to focus in class, disruptive behavior, inability to follow instructions or directions, inattentiveness, forgetfulness, and impatience to wait for his turn. More so, he is disorganized with his belongings especially his locker and school bag and he is never prepared for class. The mother reported he procrastinates doing his homework and he snaps when reminded. The mother denied a history of physical or sexual abuse. The mother added he is fidgety always, restless, irritable, and anxious. Depression was denied although he was heavily affected by their parents which happened a year ago.

## Management Plan by Bruce Nsubuga on case Billy Johnson

Discuss with the patient and parent on stimulant medication as first-line of treatment of ADHD. It is crucial to conduct a family history on conditions related to heart diseases, cardiac problems or syncope before prescribing medication.

Use of assessment tools such as Corners rating scale at baseline in diagnoses process to establish and identify pattern of behaviors as well as monitor treatment response.

Monitor weight changes or any other side effects that might be attributed by medication.

Recommendation on nonstimulant medication if the patient does respond well to stimulants.

Recommend psychoeducation, family therapy and behavioral therapy such as CBT and interpersonal therapy.
