

Due 03/23

EHR Case Study Assignment

Overview

Refer to the Course Schedule for the due date. For this assignment, you will evaluate the use of EHR systems in a rural hospital. This activity will give you experience learning how to conduct an online search for EHRs that are commercially available.

Directions

1. Select the EHR Case Study title link above and select *View Rubric* for the grading criteria.
2. Read [The Implementation and Sustainability of Electronic Health Records](#).- See attachment
3. Conduct an online search to familiarize yourself with various types of electronic health records (EHR) that are currently commercially available.
4. Select one that you think could be used in a hospital or large clinic environment.
 - Keep in mind interoperability and any standardized language that is used in the EHR you select.
5. Download and complete the [Beginning Use of EHR Template \[DOCX\]](#). Follow these guidelines- See attachment:
 - Each outline topic must include a source as a reference for your information.
 - Use valid internet websites, journals, and/or your textbook as references.
 - You may use your sources multiple times as long as they are applicable to the topic.
 - If the outline item is not found in the EHR, mention that it is "not available."
 - At least one reference must be from a journal either online or from the UA library database.

Due 03/25

Telehealth and Telemonitoring Poster Assignment

Overview

. For this assignment, you will present your findings as a professional poster and illustrate how telehealth could be used with five different types of patients. Review the following for guidance on how to create a professional poster:

- [Making an APA Poster](#)
- [Poster Guide for Use With PowerPoint](#)
- [YouTube Videos - How to Make a Poster Presentation](#)- see attachment for Post Template
- [Poster Template \[PPTX\]](#)- see attachment for Post Template

Directions

To set the scene, you are part of a large home health agency in your area. The Board of Directors for your agency wants you to investigate and present to them how to integrate telehealth and telemonitoring as part of the home care visits by your staff.

1. Select the Telehealth and Telemonitoring title link above and select *View Rubric* for the grading criteria.
2. Create a poster presentation in digital format using APA style.
 - Use the rules of effective poster presentations you learned through the provided resources above.
 - Make your presentation visually appealing and also present a persuasive case for how the home health agency and its clients could benefit (physically, mentally, or financially) from the use of patient care technologies.
3. Briefly include an overview and benefits of using telehealth and telemonitoring along with relevant barriers, limitations, or other issues (think ethics and/or privacy).
 - Remember, you will be presenting this to your Board of Directors.

4. Using various sources you have learned about in this course (Boolean logic, databases, mobile device software, or textbooks), briefly provide evidence showing how telehealth or telemedicine can be used with five different types of patients:
 - A mental health patient
 - A patient who recently had a myocardial infarction
 - A woman who is 38 weeks into a high-risk pregnancy and is on bed rest
 - A newly diagnosed insulin dependent diabetic patient
 - A patient using home oxygen therapy diagnosed with COPD
5. Your poster presentation should include **2 slides maximum** (1 slide for content and 1 additional slide for references in APA format).
6. Save your presentation as yourname-presentation.
