Dementia is such a big topic, but you did a nice job of relaying the prevalence, and the levels of prevention. I would add some sort of case study if you can, but other than that, good job!</p></div></div>					

<p>Use of Critical Thinking to Analyze, Synthesize, and Apply Knowledge</p>	<p>Beyond meeting the expectations, the student offers a clear analysis and synthesis of content with application of knowledge through robust use of scholarly citations with critical analysis of the content and the relationship to the profession of nursing.</p> <p>The knowledge gained from this assignment is synthesized to indicate a plausible path for utilization within practice as an APRN.</p> <p>All instruction requirements noted.</p> <p>40 points</p>	<p>The assignment submission is complete, providing evidence of synthesis of both assignment instructions and course content via application and demonstration of knowledge based on providing correct answers to all posed questions and use of scholarly resources.</p> <p>Synthesizes course content using course materials and scholarly resources to support required concepts by applying content for use in professional practice as an APRN.</p> <p>All instruction requirements noted.</p> <p>35 points</p>	<p>Lacks clarification or new information.
